

Using URLs in Library Publications & Hand-outs

When creating a library hand-out or other type of publication, please use only those URLs appearing on the permanent URL list. If an item, service, or resource is not represented on this list, please only include the URL for the library's homepage and indicate how to access the resource from that point. If there are services or units frequently referred to in hand-outs that are not included in this list, please talk to the Web Liaisons Steering Committee about having a permanent URL created for these services. (Please note, however, that we want to keep this list manageable so not all URLs you request be made permanent will be made permanent.)
